

Change of System

Impulse 47: 01-02-2016

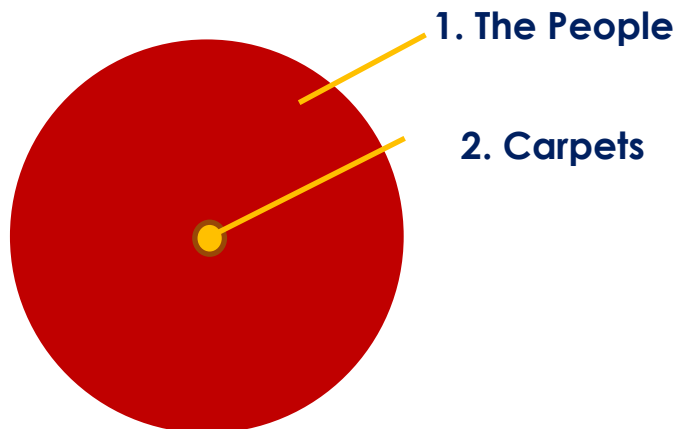

Nothing is how it seems to be. Great changes are due so that the love comes into power. Each human being is part of the system and has to change, too. The goal is a fulfilled life for all human beings. Please read also Impulse 8: "System Breakdown as Liberation", Impulse 21: "The Earth is born anew" and Impulse 30: "The Meaning of Abundance" No 3: The old financial System.

1. Old System

is going  to

2. New System

To 1: Old System

The **dark beings** consider the earth as private property. For more than 13.000 years they have ruled here. Even about 100 years ago they thought they could reach the goal of their plan and they created instruments which did the work for them.

The **instruments** are secret societies, great organizations, institutions, large banks, big corporations etc. Some of them and some secret clubs had already existed before. In order to give the people a great show, **carpets** are used. This is the field of politics. No matter how they struggle, they are only allowed to choose the lunch menu. Everything else is taken from them. For politicians with heart this system is a torture.

The people is kept in an illusion.

This is not about determining a culprit. Because we always blame ourself, through our actions and inaction. This is not about exculpating certain groups, either, for each one bears responsibility for his actions. **It is about identifying the connections and taking over responsibility for our own lives.**

♥♥ The people are awakening because of the love energy that is flowing onto the earth. Old power structures cannot survive and massive changes create a new system.

To 2: New System

The **instruments** are being unmasked, some of them are dissolving, others are created anew and love is added to their program. They now have a place among the people who they serve. **Networks** will have an important part.

As the **carpets** have been sworn to loyalty by the dark beings they are possibly not suited to now declare their loyalty towards the people. Some are trying to change sides and all of a sudden add charity to their program. The people will decide whether this is going to be successful. Politicians have heart and are peacemakers.

The people is thrilled about the many wondrous incidents, which they themselves cocreate. Changes take place from the bottom up or rather from amidst.

Your task is now more important than ever before: BE LOVE !!
