8. The Meaning of Africa
9. What makes Africa so special?

1. Preface

I am glad that you are reading these pages. **I wrote them for you with great love.** My words identify background information for you about what is happening on Mother Earth and why as it is all quite different from what you can recognize from outside. It is just not the great chaos which is going to end in a still bigger chaos. It is a big clean-up with followed sunshine. **Trust!**

What you can read here is my truth and it turns things upside down which you have been taught differently. However, you have to find your own truth. My chosen style of speech is generalisation. But there are exceptions, too, nearly everywhere. "We" means our world community. **Please bear in mind that my words are no judgement but a description.** Sincerely

Claudia Leandra König

I am a healer and work with energies.

2. What does "Wake up" mean?

In this context "wake up" means an expansion of consciousness. Become aware of what is really going on on the earth. Look behind the masks and – as the case may be – let go of your own mask. Finish all situations that hurt you and let go suffering. There is nothing else for us, anyway, but to let go. For that which will come, will come anyhow. Think with the heart and feel with the mind. See your divine light. Above all it means: **Let the love flow within you** and everything is going to change.

3. Rebirth of Mother Earth

Mother Earth is alive. Look at nature and you will see it. However, we human beings have not only treated her with kindness, we have also been especially dangerous to her. We would have destroyed Mother Earth. She saw our intention and decided to interfere. She is the boss. We have to participate. You can compare this to the mosquito on the elephant: The elephant and not the mosquito decides where he wants to go. Mother Earth has made up her mind for a reboot, a rebirth. **Therewith love comes to power.**

She asked the source of creation for help, as she does not have enough energy of her own to do it. This is the reason why they started to send love energy to the earth. **Love energy is changing everything here.** All that is not love cannot survive any more. The rebirth started about 30 years ago and is now coming to an end. **The fact that it turns out to be uncomfortable is normal** and can be compared to a child's birth.

However, we have not yet reached the peak of the transformations. Things will happen that we will not be able to explain with our intellect, therefore look at them with your heart. **We will all contribute to the design of the new earth and it will bring a fulfilled life for all human beings. ♥**

4. Consequences for Nature

Dark energies, which are not yet transformed, were and are stored in the atmosphere of the earth and in the bottom. They come from our negative thoughts, feelings and actions of our many incarnations. **Mother Earth is cleansing herself of these burdens by means of natural disasters such as earthquakes, floodings, volcanic eruptions, tempests etc.** We are in the final stage of cleansing, therefore there are a lot more of these things. In addition, we have inflicted great damage on Mother Earth, which has also got to be eliminated. We need our galactic family for the most dangerous damages, who has the appropriate technologies. Look at the night sky: there you can see their light ships. Not all the lights there are stars. The earth was colonized from outside. They are our sisters and brothers. **They love us. ♥**

5. Consequences for Man

Our physical body is also being cleansed, as it is absorbing the energy. **It can be irritating**, when the body possibly starts to go haywire. You will find further explanations and help here (www.claudia-leandra.com):

Impulse 1 "Ascension in the last Phase of the Countdown" No. 4 "Effects of the Ascension on the Body"
Impulse 42 "Support for your Physical Body"

The most confusing thing can be **our inner emotional world, which is also being cleansed**. Here we can experience great mood changes and feel unstable. Controlling or suppressing emotions will not work any more. Human beings who cannot allow love tend to be aggressive in word and action. They fear love and they fear to lose something because of it. You will find further explanations and help here:

Impulse 15 "What on earth is going on with me?"
Impulse 44 "Turbulences" No. 2 "Inner Conflicts"
Impulse 45 "Update on the Ascension"

6. Consequences for World Affairs

Nothing is as it seems to be. The dark beings – a little group of people – rule the world. They are black magicians and form the shadow governments. They control the world by means of the financial system by sucking it dry. Their strategy is simple: They set us against each other. Doing this they spread fear and make us poor and sick. However, now they are panicking as **we are on the highway of truth**. The masks are more and more falling, old structures of power cannot survive, **old things have to go and new things come**.

7. The World Events as a Football Match

Imagine the world events to be a football match. Five minutes before the end of the match team A has scored 10 goals and team B 0 goals. Do you think that team B will simply leave the playing field five minutes before the end as they have lost

anyway? No, they will play till the end. Only then will all the players leave the field. That's how it is with the battle between light and darkness, which is taking place right now. **The darkness has already lost. The light wins. Trust!**

8. The Meaning of Africa

The energetic key for the rebirth of Mother Earth is in Africa. Moreover, there is the key for the redemption of the earth, which has recently been activated. Some call this energy field the "Grail of Redemption".

9. What makes Africa so special?

The most courageous souls have chosen Africa. They were optimally trained for their mission and they have proved themselves in many lives. Now it is important to see it and remember it. **Africa will play an important role in future on the world stage.** And you make that possible. Many multifaceted impulses will come from Africa and you are the creator. **You are the one you have always been waiting for. You are the diamond!** Start to act.

If you do not act you have to be satisfied with the life you have. But if you want to have something that you have never had before, you will have to do something you have never done before.

If you knew, who you really are, you would not struggle with yourself. You would view obstacles as challenges and you would trust. You would take risks in your own responsibility and you would "go boldly where no man has gone before". You would accept and cherish yourself the way you are. You would know that you are important and that you are needed. You would be looking forward to the forthcoming change.

Nobody can fulfill your task for you, only you can do this. ♥

**The best idea is worth nothing,
when it is not followed
by action.**

**Die beste Idee ist wertlos
wenn keine Handlung folgt.**
